

How to download HURT race maps to your phone

1. Download the “Avenza Maps” app from your phone’s App Store by searching by name or use the links below:

Apple App Store: [Avenza Maps](#)
or <https://itunes.apple.com/app/apple-store/id388424049>

Google Play Store: [Avenza Maps](#)
or <https://play.google.com/store/apps/details?id=com.Avenza>

Notes: 1) Free version is sufficient.

2) These maps also work in Gaia GPS or other free apps if you have another favorite

2. Download map into Avenza Maps app

- Tap on the plus [+] icon in the top right side of screen
- Select “Import Maps”
- Select “From the Web” and then type or copy/paste <https://hurthawaii.com/HURT-Peacock-Challenge-13.pdf> and tap “go”
- You should then see it appear in your list of maps
- Tap on the map name to ensure it downloaded and opens

Important notes:

- Use these maps only as a rough guide and not your only source of data, stay aware of what is around you. In mountainous areas, there can be errors in GPS both in making of maps and on your phone, so do not blindly follow this map. However, it will readily tell you if you are straying off course and if you are headed in right direction to get back.
- On the race course you will be able to see your real-time location by simply opening the app and opening the map. You may need to wait a few seconds or tap the arrow in bottom left to update position when you re-open the map. It only requires GPS (not cell coverage) and will work in airplane mode if you are trying to save battery.
- For those that want to see it working prior to race day:
 - If you want to have a map where you can see how it works and see your real-time location (i.e. the blue dot) prior to race day and you are on Oahu, you can use this map of the entire island: <https://caltopo.com/p/F08HC> Download this map using the same instructions above, just different web address.
